XRoad

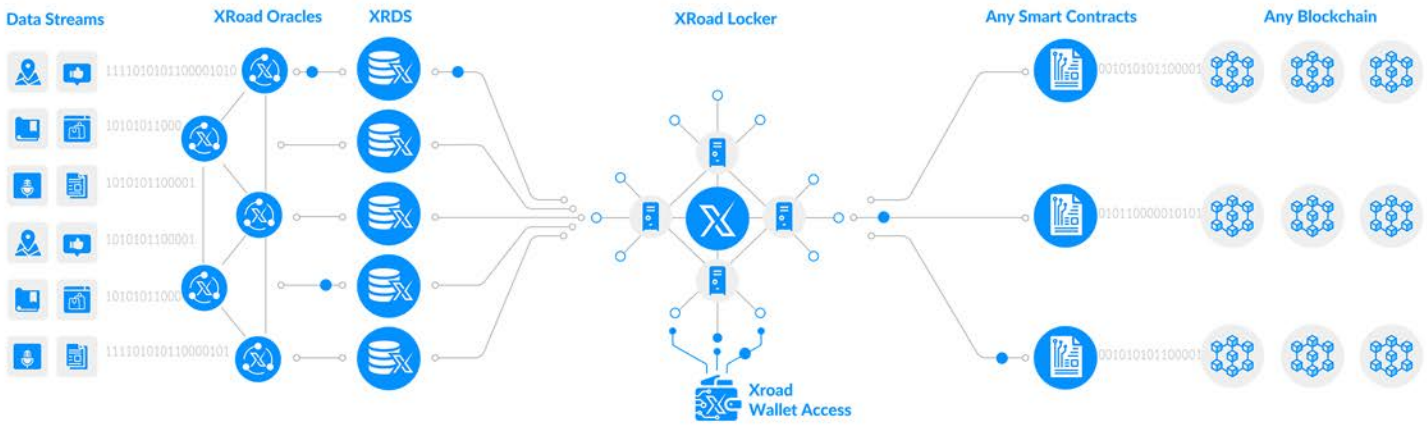
Where Blockchain Technology and the World's Data Intersect

The intersection for management of your data from off-chain to on-chain and back

www.exroad.io

XRoad Platform

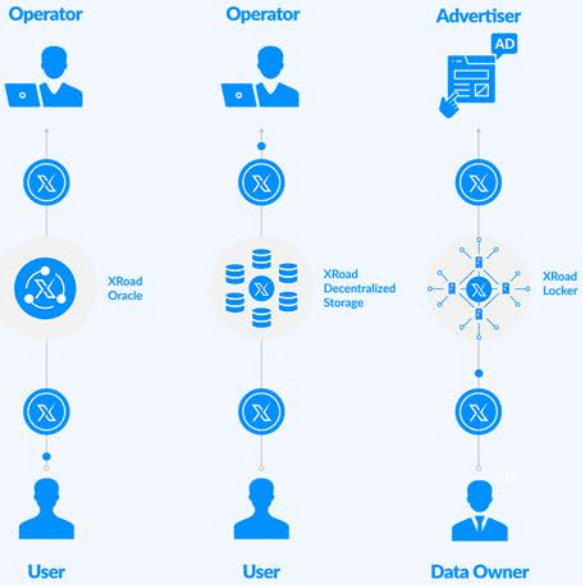
XRoad deploys the decentralized infrastructure needed to serve as the intersection between blockchain technology and the world's data.



XRoad Locker

"Users own their data and decide how data is used."

XRoad Locker is the decentralized personal data storage space.



XRoad Oracles

XRoad Oracles effectively and efficiently bridge the connectivity gap between off-chain data and blockchain smart contracts.

XRoad Decentralized Storage (XRDS)

XRoad's blockchain-based decentralized storage is the convergence between decentralized data management with individual data self-sovereignty.

XRoad Locker

With XRoad Locker, the user is truly in complete control: Information, who has access, which data to disclose, and the value of disclosed data.
